TENNILLE Greater Values

Career of Lieut. Boyer Replete with Adventures: Won War Cross.

A life filled with war experiences was ended with the death of Lleut. Wilbur Le Roy Boyer, of this city, who was buried at Arlington yesterday afternoon. The young lieutenant had crowded much into his twenty-four years, his experiences since his enlistment for service as an ambulance driver being narrow escapes from death replete with adventure. While serving in this capacity he was twice a victim of gus attacks. Later he won the croix de guerre while serving with a French tank unit. In an attack the tank was struck by a shell and a gunner was killed. The explosion started a fire which ignited the clothes of the dead man. Nearby lay a wounded soldier on the ammunition heap. Lieut. Boyer stamped out the flames, saving his comrades and the tank. He then assisted in carrying the wounded man and the body of the gunner behind the lines. In this encounter his eye was permanently blinded.

While on his way home for a rest his ship the Antilles, was struck by

manently blinded.

While on his way home for a rest his ship, the Antilles, was struck by a torpedo. He was rescued from the wreckage and returned to Paris to recuperate. On the second homeward-bound trip he arrived in England in the midst of an air raid.

bound trip he arrived in England in the midst of an air raid.

Upon his arival home he sought en-listment in the army. His physical disabilities debarred him. However, he was finally permitted to enlist. Later, for merit, he was promoted to the rank of lieutenant and assigned as instructor at Camp Colt, Gettys-

Market Tips for Housewives

Prices to retailers and general market information furnished by the Bureau of Markets, U. S. Department of Agriculture; fair prices to consumers by the District Food Administration. ABUNDANT—Green tomatoes, onions, pumpkins, squash, peppers, cabbage,

turnips, potatoes, cooking apples.
CORMAL—Lima and string beans, ripe tomatoes, sweet corn, carrots, spinach, eggplant, bets, enting apples, lettuce.

SCARCE-Oranges, bananas, oyster plant, grapes, peaches, grapefruit,

Irish potatoes have been gradually dropping in price for the past week. This morning retailers paid from 40 to 45 cents per peck for them which makes the fair retail price from 45 to 55 cents per peck of 15 pounds. The Irish Cobblers are bringing the higher prices while most of the McCormicks are selling near the lower figure. The whosesale price of sweet potatoes range from \$4\$ to \$5.25 per barrel, or from about 11 to 13 cents per quarter peck. This makes the "fair retail price" from 13 to 17 cents or somewhat higher than the Irish potatoes at the present time. Three weeks ago the "sweets" were slightly cheaper than the "Irish."

NEW PRODUCTS ON THE MARKET.

Among the comparatively new products on the local market which are attracting the attention of buyers are cranberries, quinces and grape-fruit. The cranberries are coming from Cape Cod. They are costing retailers from \$9 to \$10 per barrel, or from 9 to 10 cents per quart. The quinces are mostly from New York State and the grapefruit from Florida. THE POTATO SITUATION.

The fair prices to consumers given below cover those charged by both "cash-and-carry" and "credit-and-delivery" retailers. "Cash-and-carry" retailers should sell near the lowest figure given. Unless otherwise stated, all prices are for products of good quality.

If consumers are charged, on any day, prices in excess of those published on that day in the "fair-price-to-consumers" column, they should immediately bring the matter to the attention of the agent of the Dis-

ASKS 16 MORE

Daniels Presents Program to Spend \$600,000,000 in Three Years.

When the nations disarm, the United States navy is going to have omething to disarm with. Secretary Daniels yesterday asked Congress for \$600,000,000 for another three-year navy building program to produce sixteen

more capital ships—ten battleships and six battle cruisers—and 140 smaller war craft.

This building program is in addition to the 156 vessels provided for in the first three-year program of the naval appropriation act of 1916.

"All the ships provided for in this first program are required to be under construction prior to next July." first program are required to be un-der construction prior to next July," said Secretary Daniels in comment-ing yesterday afternoon on his new recommendations to Congress, "and it is expected that in the ensuing fiscal year, which will begin July 1, 1919, shipbuilding facilities will be available to begin further work.

Variety in Small Types.

"The new program of 156 vessels prescribes specific numbers of bat-tleship and battle cruisers only, there being ten battleships asked for and six battle cruisers. As regards small-er vessels, although the total number is to be 140 it is simply asked that is to be 140, it is simply asked that they be of types already approved and in existence, or of new types that may develop in the life of the pro-gram, the details being left to the discretion of the Navy Department. They should embrace graft of types They should embrace craft of types already constructed or new types already constructed or new types demonstrated to be necessary by the experience of war and as the efficient and symmetrical development of the

navy may require.
"This program, if authorized by Congress, as I am confident it will be, will give us sixteen capital ships that will give us sixteen capital ships that will be the equal to any afloat at the time they are built. The battleships and battle cruisers authorized in the first three-year program will be un-excelled by those of any other navy, and the country may rest assured that, in the new construction author-ized, our constructors will produce the most powerful and effective fight-ing craft. ing craft.

Exclusive of Old Program

"The total expenditure authorized on this new program is \$600,000,000 upon this new program is \$200,000,000.
the provision for the first year being a third of this, \$200,000,000. This is exclusive of estimates for emergency appropriations for new vessels to be built under war urgency, which total \$140,000,000, and also of estimates for confinuing and pushing the old arecontinuing and pushing the old pro-gram, the emergency construction of destroyers under way, etc. "Including the \$60,000,000 for which

authorization is requested in the new three-year program, the tota esti-mates of the department for ship ectatruction, including armor and armament, amount this year to \$872.-98:000. The total amount I recommend for appropriation next year for ship or astruction, that is, for completing cessels already authorized and for new vessels, is \$572,099,000."
